

Deepak Vishwakarma

DevSecOps Engineer

Bengaluru, Karnataka, India · deepakv.knit@gmail.com

deepakv30.github.io · linkedin.com/in/deepakv30 · github.com/deepakv30 · medium.com/@deepakv30

Summary

DevSecOps Engineer specializing in GitLab administration, DevOps automation, CI/CD, Kubernetes, Docker, AWS, and Linux system administration. Focused on infrastructure management, CI/CD optimization, and automation for efficient, scalable workflows. Expanding into MLOps to connect AI workflows with DevOps automation. Based in Bengaluru; currently at Dell Technologies.

Experience

DevSecOps Engineer

Dell Technologies · 2023 – Present

- Administered GitLab for 200+ engineers; optimized 50+ CI/CD pipelines reducing deployment time by 65%.
- Implemented ArgoCD GitOps + Kubernetes (EKS) for 15+ microservices with zero-downtime releases.
- Embedded DevSecOps: Trivy, SonarQube & OWASP scanning in pipelines; remediated 200+ critical vulnerabilities.
- Built Terraform IaC modules for multi-account AWS infrastructure & monitoring (Prometheus/Grafana/ELK).

Linux System Administrator

Previous Roles · 2021 – 2023

- Managed 100+ RHEL/Ubuntu servers; automated patching & reduced MTTR by 40% via shell/Python scripting.
- Implemented security hardening (CIS benchmarks) & compliance monitoring across production fleets.
- Dockerized legacy apps and supported initial Kubernetes adoption.

Key Achievements

- Internal award for DevOps automation excellence & infrastructure optimization (2024).
- Cut CI/CD deployment time by 65% and reduced failed deploys by 80% via GitLab + ArgoCD GitOps.
- Embedded automated scanning (Trivy/Sonar) achieving 95%+ vulnerability remediation SLA.
- Active technical blogger (Medium) plus internal workshops on DevOps, Linux & Kubernetes best practices.
- Architected GitOps platform and Terraform modules adopted across multiple teams.

Skills

DevOps & CI/CD	GitLab CI/CD, Jenkins, GitHub Actions, ArgoCD, Ansible, Terraform, Helm, Maven, Gradle
Cloud & Container	AWS (EC2, S3, ECS, Lambda), Docker, Kubernetes, container orchestration, microservices
Security & Monitoring	DevSecOps, SonarQube, Trivy, OWASP, Prometheus, Grafana, ELK Stack, APM tools
Systems	Linux (RHEL, Ubuntu, CentOS), shell scripting, Python, system automation, performance tuning
Version Control	Git, GitLab administration, GitHub, branch strategies, code review workflows
Practices	MLOps, AIOps, Infrastructure as Code, GitOps, observability, SRE practices

Certifications

- AWS Certified DevOps Engineer – Professional · Amazon Web Services · 2024
- Certified Kubernetes Administrator (CKA) · Cloud Native Computing Foundation · 2023
- HashiCorp Certified: Terraform Associate · HashiCorp · 2024
- GitLab Certified Associate – CI/CD · GitLab · 2023

Selected public work

- DevOps Mastery Guide — hands-on path from Linux to Docker, Kubernetes, Terraform, GitHub Actions, Prometheus, and Grafana.
- Apna Hisab — split trip, dinner, and flatmate expenses; settle up with UPI.
- Additional demos: JS Calculator, Todo Application, Alien Invasion, Hangman — see github.com/deepakv30.
